

## Standard Features

### Four standard color options:

- Class 1 Bronze anodized
- Class 1 Clear anodized
- Sky White
- Desert Tan

### Heavy Wall 6063-T6 aluminum

- Block perimeter frame
- Head, jamb, & sill closures
- Flush sill with exterior riser
- Stainless steel track insert
- Matching finish sill pan with integral slab nosing
- Thermally-broken panels for 1" glazing

### All stainless steel hardware:

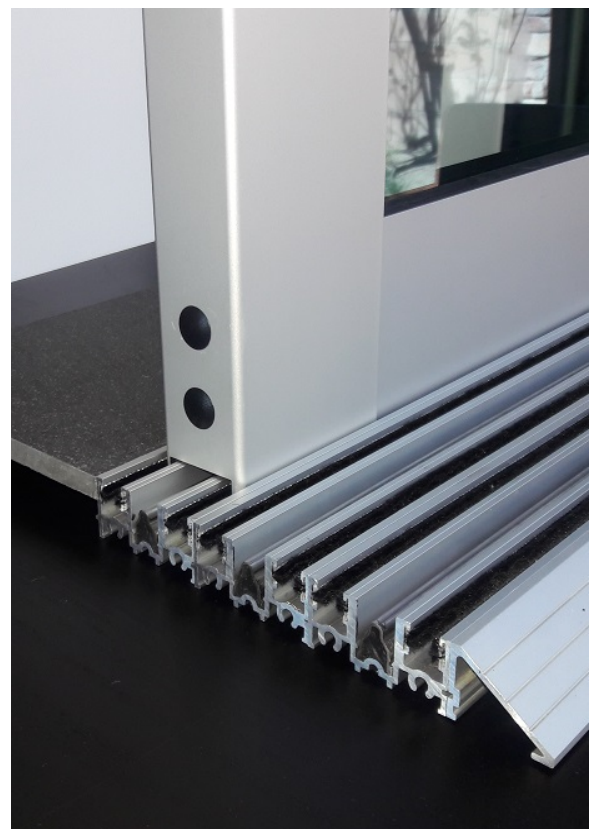

- Brushed stainless flush pulls and actuator
- Easy action lever-latch
- Maximum security laminated hook-lock
- Precision bearing tandem rollers

### Additional Standard Features:

- Adjustable reinforced jamb strike with integral dust box
- Exterior AND interior pocket trim
- Pocket closure panel
- Unlimited configurations including pocketing, slide-by, 90 degree, and more!

**Maximum panel width: 84"**

**Maximum panel height: 144"**

## Optional Features

- High performance sill pan
- Heavy Lockstile
- Concealed Slim-Track™
- Wireless Integrated Motorization/Automation
- #275 "Easy-Glide" tandem roller package
- #350 "Super-Glide" tandem roller package
- #450 "Monumental" tandem roller package
- Single panel insect screen - Light or HD
- Multiple panel insect screens - HD only
- Color coordinated hardware
- Custom Colors
- Specialty & custom pulls
- Keyed locks

### Concealed Slim-Track™

Our Concealed Slim-Track™ option is designed for interior applications, or exterior applications, where air and water infiltration and wind loading is not a concern. 1" floor tracks are installed to be flush with stone or concrete flooring, and staggered for better concealment while panels are closed. The panels are fully weather-stripped around the base.

### Configurations

Our 4550 Vari-Slide™ system is designed for a myriad of dimensional and operational configurations, including pocketing, interior and exterior slide-by, open corner, and all-slide, with single and multiple panels.

### Precision Bearing Glide Options

The 4550 Vari-Slide™ system glide options feature precision engineered stainless steel tandem rollers in three rail sizes:

- 2.75" bottom rail with E-Z Glide rollers
- 3.50" bottom rail with Super-Glide rollers
- 4.50" bottom rail with "Monumental" rollers

### Motorization/Automation

Monumental products can be motorized (hardwired or wireless) for operation - and integrated with your home automation system - using Doors-in-Motion automation systems.
